LET'S REPOWER AUSTRALIA! **www.climaterally.org**

COUNTDOWN TO COPENHAGEN

In December 2009, governments of the world will meet in Copenhagen to forge a critical new global climate change agreement. Australia must support, not hinder, strong global action to cut greenhouse pollution to avoid catastrophic climate change.

In the midst of the global financial crisis, direct investment in renewable energy will create jobs, stimulate the economy and build Australia's capacity in the low-carbon economy of the future.

Join tens of thousands of Australians to stand up for real and urgent action! Wear red for urgency.

We need:

1. 100% RENEWABLE ENERGY BY 2020

Australia must make the shift from fossil fuels to 100% renewable energy from wind, solar and other available technologies within a decade.

2. GREEN COLLAR JOBS WITH A JUST TRANSITION FOR WORKERS

We can renew our economy by creating hundreds of thousands of 'green jobs' and supporting workers to make the shift to sustainable industries.

3. A STRONG INTERNATIONAL AGREEMENT WITH CLIMATE JUSTICE FOR ALL

Australia must take the lead in global climate talks. Globally, we must also uphold the demands and rights of Indigenous Peoples and communities worldwide who are most affected by climate change and least responsible for it.

4. CLIMATE POLICIES THAT MAKE THE BIG POLLUTERS PAY

The Government's draft Carbon Pollution Reduction Scheme must not become law. It will allow big companies to go on polluting and won't reduce Australia's greenhouse pollution.

Bring your friends and family to the Rally on June 13th.
